

## About Our Program

Bancroft NeuroRehab helps people in need of neurological rehabilitation live more fulfilling and productive lives through a wide range of therapeutic, vocational, residential and outpatient services. Opened in 1991, Bancroft NeuroRehab is a division of Bancroft, a leading nonprofit service provider for people with neurological disabilities.

Bancroft NeuroRehab therapists treat a wide range of neurological disorders, including traumatic brain injury, concussion, anoxic or hypoxic brain injury, stroke, brain tumor, mild cognitive impairment, Alzheimer’s disease/dementia, multiple sclerosis, and Parkinson’s disease.

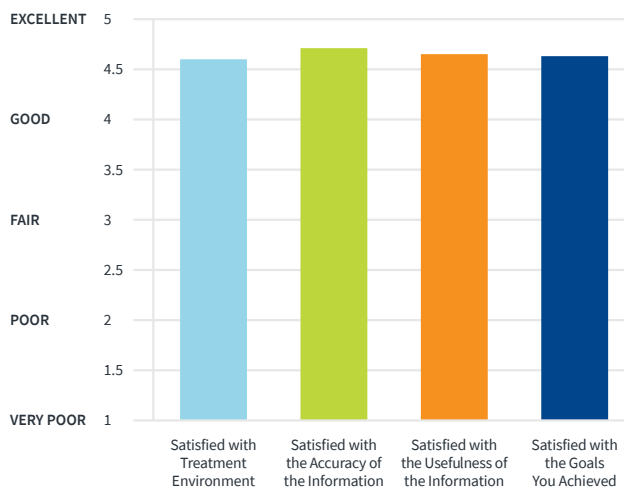

### How Our Clients Rate Our Outpatient Services

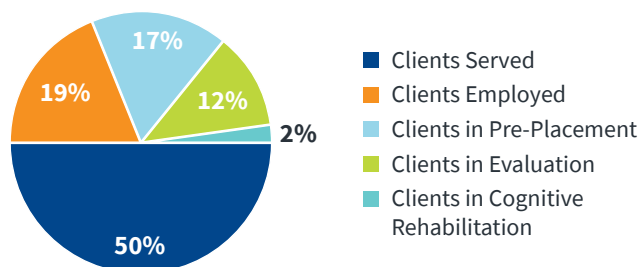

All Bancroft NeuroRehab therapists received a “good” or higher rating, on average.

### Outpatient Program Satisfaction

## Meaningful Work Enriches the Lives of People with Brain Injuries and Neurological Conditions

Bancroft NeuroRehab’s vocational and employment experts help individuals succeed, step-by-step, in their return to meaningful work – from volunteering in the community to holding a paid position.

## Positive Outcomes Reflect Effective Programming

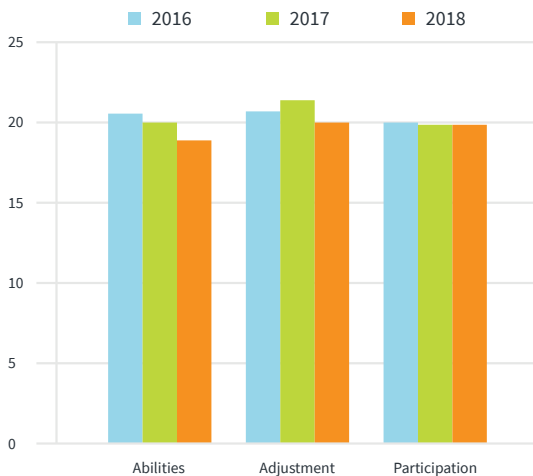

The Mayo-Portland Adaptability Inventory – Fourth Edition (MPAI-4) provides a standardized measure of abilities, adjustment, and social/community participation, and is one of the primary outcome measures used at Bancroft NeuroRehab. A score of zero on any item indicates the individual is experiencing no functional impairment; higher scores are associated with higher levels of impairment.

Each year Bancroft NeuroRehab tracks the MPAI scores of our clients to ensure the quality of care being provided. The scores below indicate that our clients at Bancroft NeuroRehab had a lower overall level of impairment in 2018 as compared to the other two years.

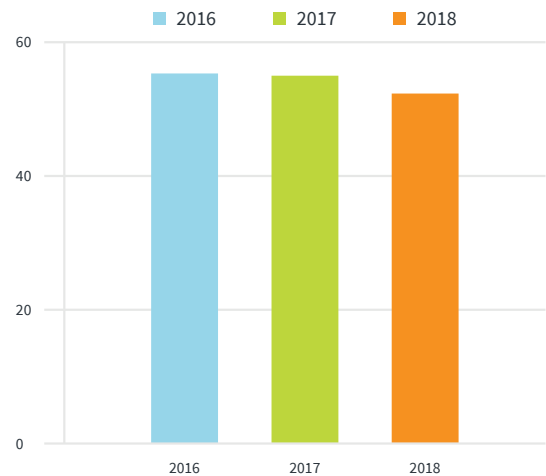

“Going to Bancroft...I was so impressed with my...treatments. My therapist was incredible, motivated me so much...put me to the next level. The therapists really inspired me to tell others to come. Definitely a place to recommend for others...”
